**FG IV Scientific/Technical project officer –  
Power system adequacy and flexibility analyst**

<p><b>Position for:</b></p> <p><b>FG IV Scientific/Technical project officer</b></p>	<p>As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.</p> <p>With 7 Scientific Institutes, 3 Corporate Directorates and the DG/DDG Office, the JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: <a href="http://www.jrc.ec.europa.eu">http://www.jrc.ec.europa.eu</a>.</p> <p>The Energy Security, Systems and Market Unit of the Institute for Energy and Transport, comprising of about 50 staff, supports the policy-making processes on electricity, gas and other energy related topics.</p> <p>Within the ESSM Unit, the Smart Electricity Systems and Interoperability team (<a href="http://ses.jrc.ec.europa.eu/">http://ses.jrc.ec.europa.eu/</a>) performs independent scientific research and acts as in-house scientific consultant for EU policy-making actors with particular focus on the on-going transformations of smart electricity systems.</p> <p>The Unit is looking for a candidate responsible for supporting DG ENER on the adequacy and flexibility assessment of the future power grid, via targeted power system security analyses.</p> <p>The selected candidate is expected to interact with the policy making colleagues and with the relevant stakeholders (ENTSOE, ACER in primis) and to expand strategic research streams within the JRC on probabilistic analyses applied to power generation, transmission and demand.</p> <p>Qualifications:</p> <p>The Candidate should have a completed university degree in Engineering or Science of at least three years attested by a diploma and at least five years of research experience in energy technologies or, alternatively should have a PhD degree preferably with research experience in relevant fields.</p> <p>Experience in electricity system/market modelling/analysis is an asset, as well as knowledge of power market regulation.</p> <p>A good knowledge (B2) of spoken and written English is required. Very good writing skills (supported by a publications list), are essential.</p> <p>We look for a person with strong interest in energy issues, who will have a good aptitude of taking initiative, developing new concepts and be a strong team player.</p> <p>This position offers a number of varied and interesting tasks in a friendly and well integrated Unit to a motivated, flexible and reliable colleague.</p>
