ETSAP-TIAM version control

- Revitalized collaboration on ETSAP-TIAM based on a version control system (Najub and GIT)
- Makes it possible for all participant to develop on the same base model and immediately have access to new updates made by others
- The system will be hosted at a DTU server and all users will through the software GIT and some helping software have access to the model and to send updates to it

Deliverables:

- Task 1. Installation and configuration of version control system at participants computers including running support throughout the project
- Task 2. Introduction course (2 days workshop) in the use of the version control system plus documentation
- Task 3. Test of the system - all participants upload improvements to the model
- Task 4. Updated running version of ETSAP-TIAM

SharePoint

- Folder: Projects description and contacts/partners
- Start issue tracker (Update technology data)
- Folder for each partner for documentation etc.
- Gate keeper function - e.g. on ETSAP meeting spending 2-5 hours to agree on updates

GIT - version control
