

ANSWER-TIMES update (version 6.7.9)

Released 10/12/12

Enhancements

- Now utilizes ANSWER-aware version 3.3.8 of the ETSAP TIMES GAMS code.
- The stochastic implementation has been enhanced to allow a maximum of 300 “states of the world”. (This enhancement was requested by and provided to IFE Norway some time ago, but has not until now been made generally available.)
- Case Management has been enhanced by providing New Case, Copy Case and (full) Edit Case facilities. (Previously, the Run Model facility was the only way to create a new Case, or copy/edit an existing Case.)
- A number of bugs have been fixed.
