KanORS Consultants

VEDA-FE.done

- Merge models
 - Multiple template folders can be run as a single model
 - Common files folder
- Case Manager
 - Remember old runs
 - Filter by template folder
- Demand module
 - Naming convention: Dem_Alloc+Series.xls
 - Changes in the interface can update Excel files

VEDA-FE.done

- ~TFM_AVA tag in SubRES transformation files to control tech availability in regions
- Double-clicking data in browse mode leads to the source data in excel
- Filter navigator lists as per consistency status
- Trade module
 - Links in Excel
 - Parameters in matrix form as well
- Scenario files
 - ~TFM_DINS
 - Simplified headers

VEDA-FE.todo

- Evaluate techs
- Batch processing
- Direct edit of selected data

VEDA-BE.done

- Ex-RES

VEDA-BE.todo

- Explore sub-optimal solution
