

Visualization tool of pathways to a deep de-carbonized energy system for dialogues with decision makers.

Mikkel Bosack Simonsen
Research assistant
DTU

Don't worry it is only 8 slides including this

Climate Agreement visualisation tool

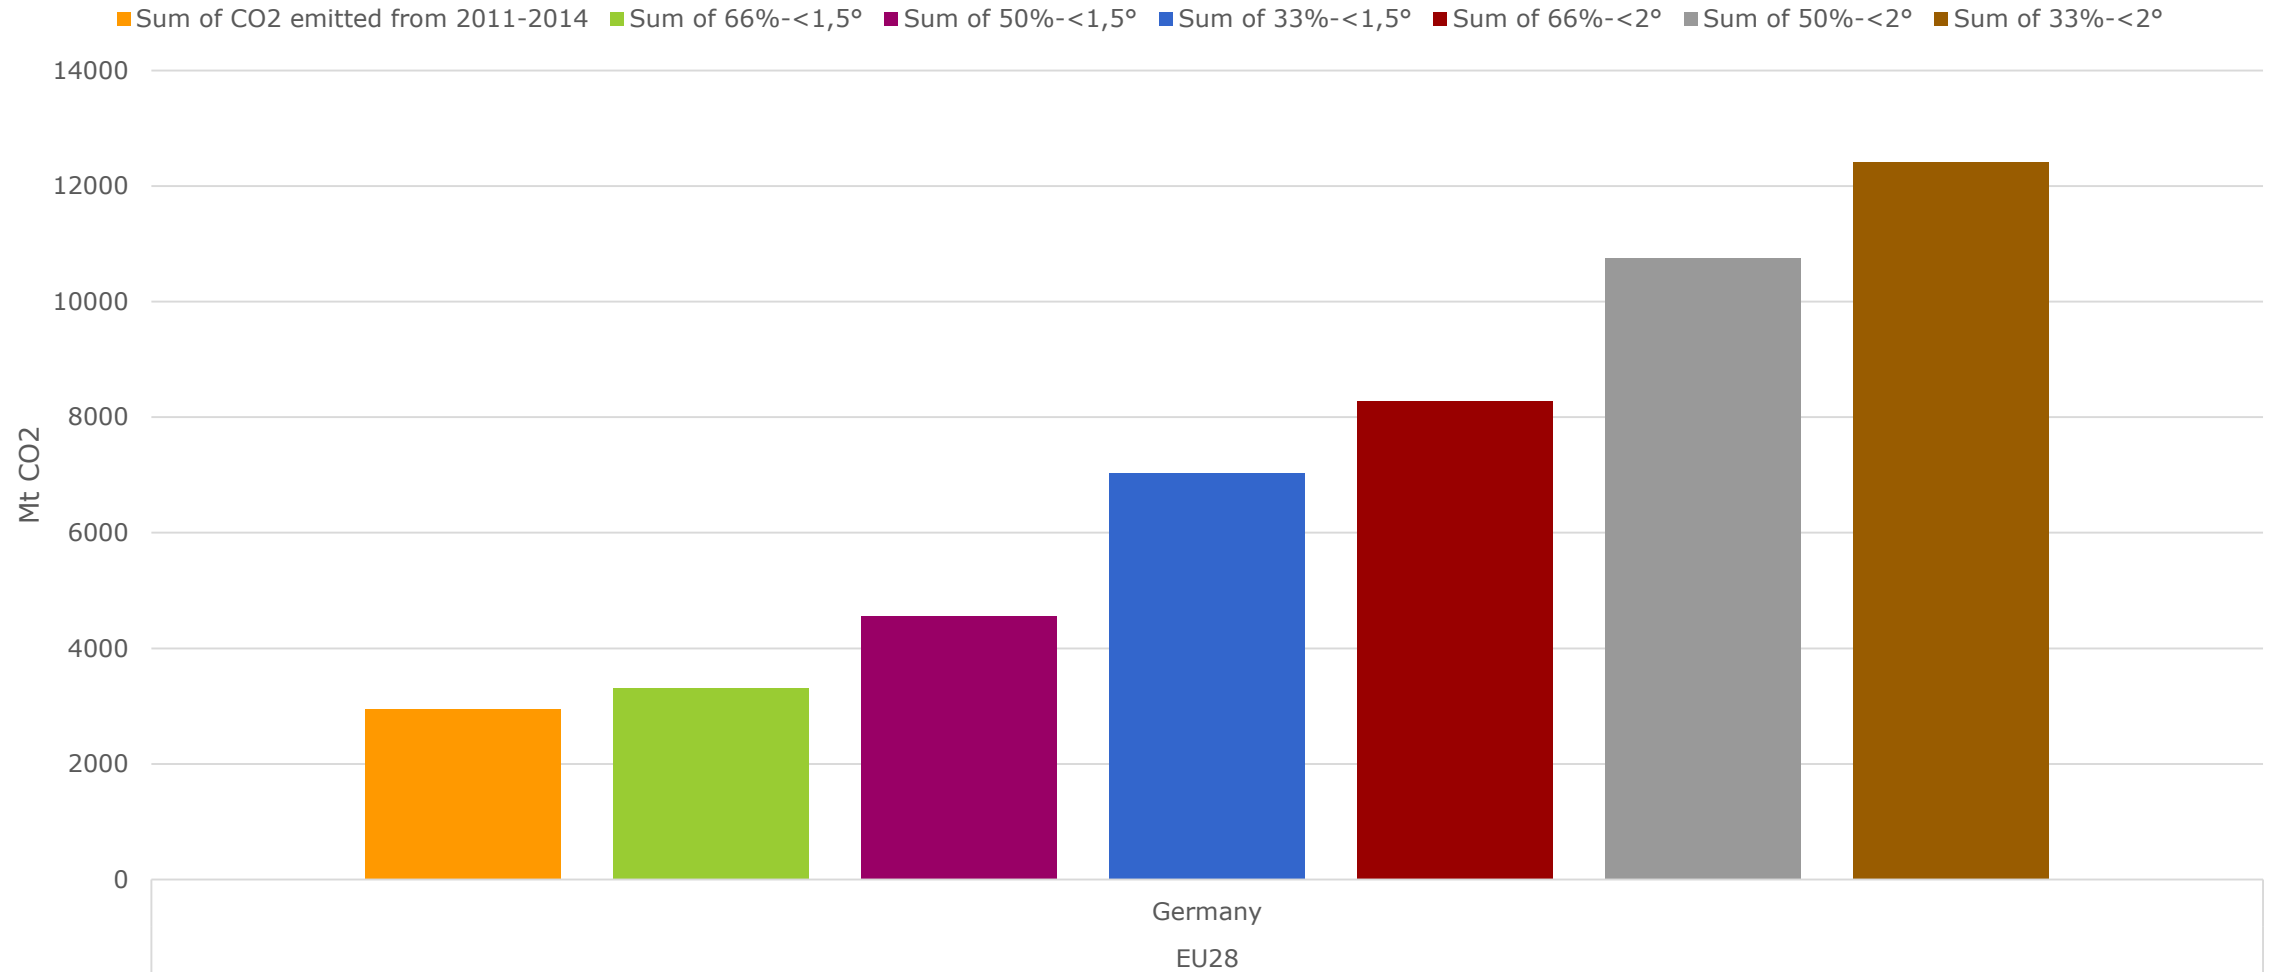

FAKE NEWS!!!!

Danish casework

- The Danish opposition have no direct support for energy analysis
- Public sector
 - is often influenced by a variety of sources
- The industrial sector
 - In particular the small industries

The structure of a visualisation tool

The experience so far?

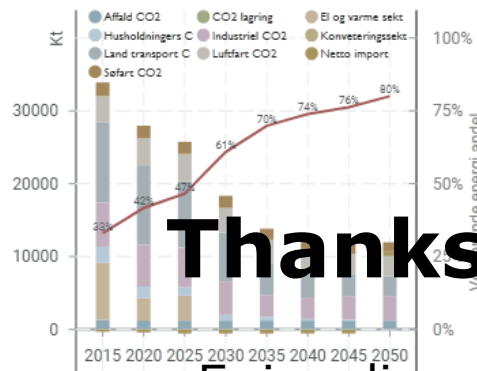

- Issues

- Due to fast updates there are risk involved
- We can't measure if the tool is used

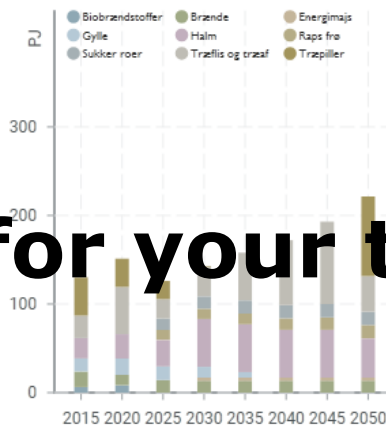

- Benefits

- Critics can in many ways be very useful for optimising the models
 - In particular energy organisations and companies
- Cowi have address us with the interest in working with energy models
